

# Where Does AI Fit? Balancing uncertainty with progress

SAME 2024, February 9, 2024

### How the World Used to Think of DFW....

**XIA** 

### How we see DFW today

**42 FORTUNE 1000 Company HQs** 

Highest Number of **Technology Job Postings** Nationally [2021]

# 267

**People Move to the Region Every Day** 

### **#6 Most Innovative in the** World

2ThinkNow Innovative Cities Index 2021

**Fastest Growing** Large City in the Country

FORT WORTH.

#### **#10th Most Resilient City in the World** Savills Resilient Cities Index

2022

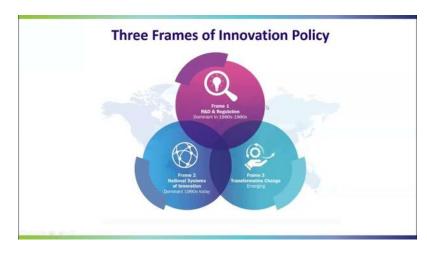

### The Critical Nature of the Innovation Lifecycle

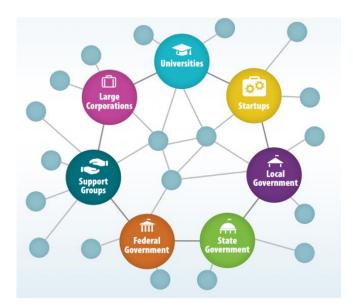

### Integrated Research Drives Progress

UTD awarded \$30 million from DoD to establish energy storage systems campus

#### Texoma Semiconductor Tech Hub Designated by US EDA

Texoma Semiconductor Tech Hub will foster a consolidated semiconductor innovation ecosystem with supply chain resilience.

Dallas selected as one of three national hubs for new medical innovation federal agency

Department of Commerce Invests \$8.8 Million to Grow Biotechnology Workforce in North Central Texas Through American Rescue Plan Good Jobs Challenge

#### Center for Electric, Connected and Autonomous Technologies for Mobility (eCAT)

Funded by National Science Foundation's Industry-University Cooperative Research Centers Program

# INNOVATION REQUIRES NEW THINKING, NEW TOOLS & INTENTIONAL RISK-TAKING

### What are Successful Cities Doing?

#### **Common Threads & Best Practices**

- All have dedicated internal teams and external support organizations
- All have defined innovation corridors, zones or facilities
- Majority are driven by public leadership and investment: local [PTC kicked off by EDA grant and \$8m local infrastructure investment, SA by establishment of internal team and SmartSA zones and sandboxes]; state or Federal [Columbus, kicked off by USDOT]; Austin [initially driven by University-driven initiatives with supplements by local, federal and coalition-driven investments]
- Creating a culture of risk-tolerance for innovation investments and elected leadership 'grandstanding' to establish profile, and back-up commitment with action
- Stronger ties and support of startup ecosystem from a programmatic and testing environment
- Strong, symbiotic relationships between public, industry, real estate and academia

### **Innovation attracts Innovation**

**Collaboration > Competition** 

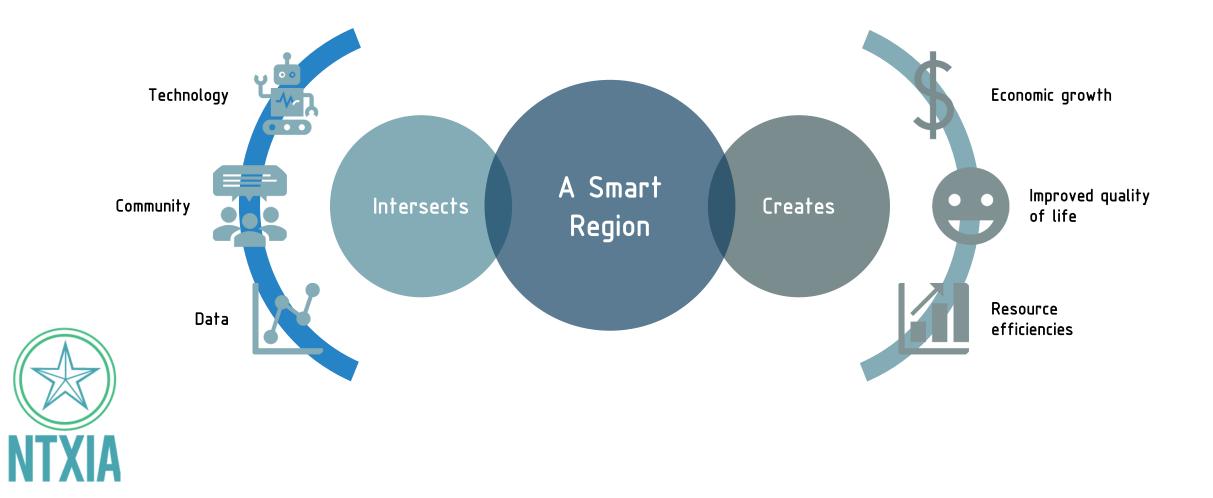

**Human-centered Approach** 

**Public Sector Leads Private Investment** 

**Ability to Drive Policy** 

### Envisioning Smart Cities & Smart Regions

### **About the Dallas Innovation Alliance**

Founding Mission: Support the City of Dallas in the design and execution of a multi-phased smart city strategy

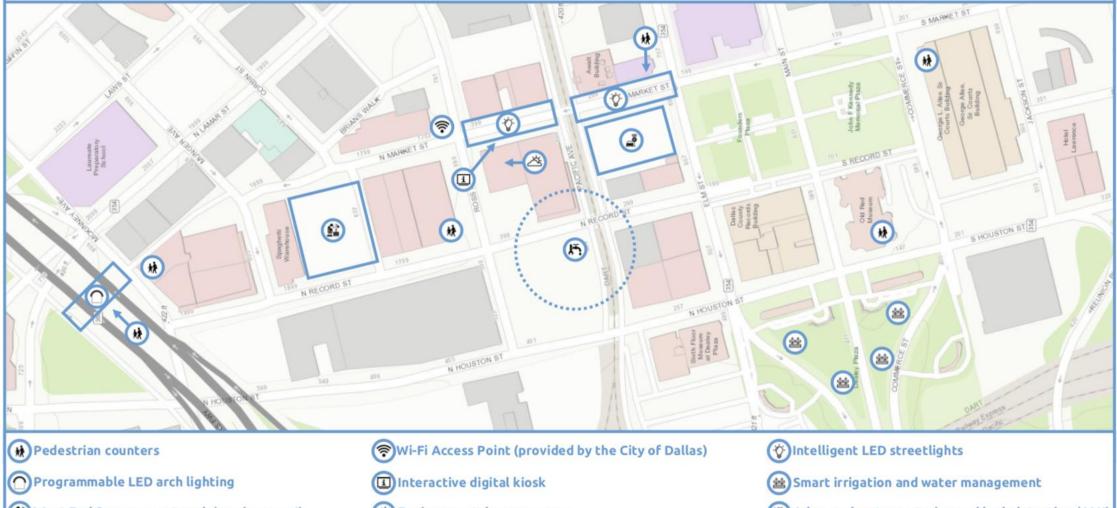

**Collaboration**: DIA has over 30 partner organizations and has worked with over 20 city departments. We have working relationships with 70 cities around the world.

**Results**: Dallas has the fastest-to-market smart cities initiative in the country.

## Smart Cities Living Lab: The West End

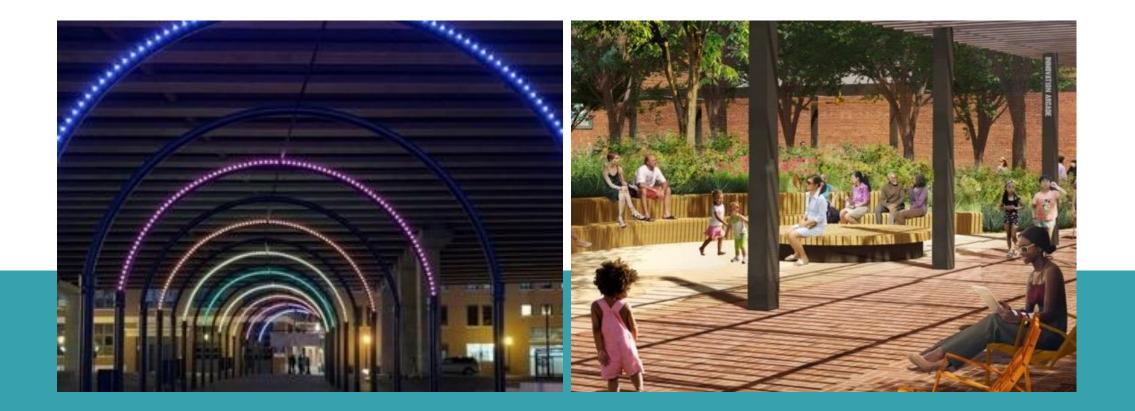

( West End Square smart park (coming soon!)

Environmental sensor array

Smart parking lot

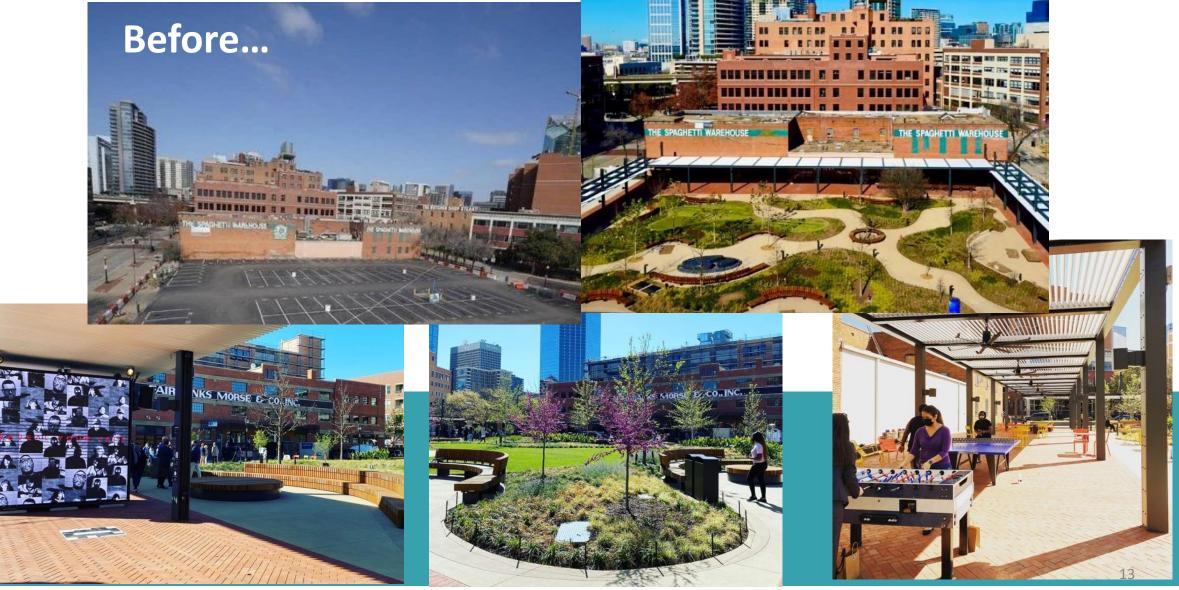

Advanced water metering and leak detection (AMI)

# Reimagining Highways and Parking Lots Dallas Alley Reimagined + West End Square Park

### In Reverse...From Parking Lot to Paradise West End Square Smart Park

# THE NORTH TEXAS REGION

## Why the Consortium Approach Works

### A freestanding, independent nonprofit allows for:

- Flexibility and speed-to-market
- Convening of best-minds
- Execute pilots quickly prior to formal procurement, under the guidance of public sector partners

# Our Mission

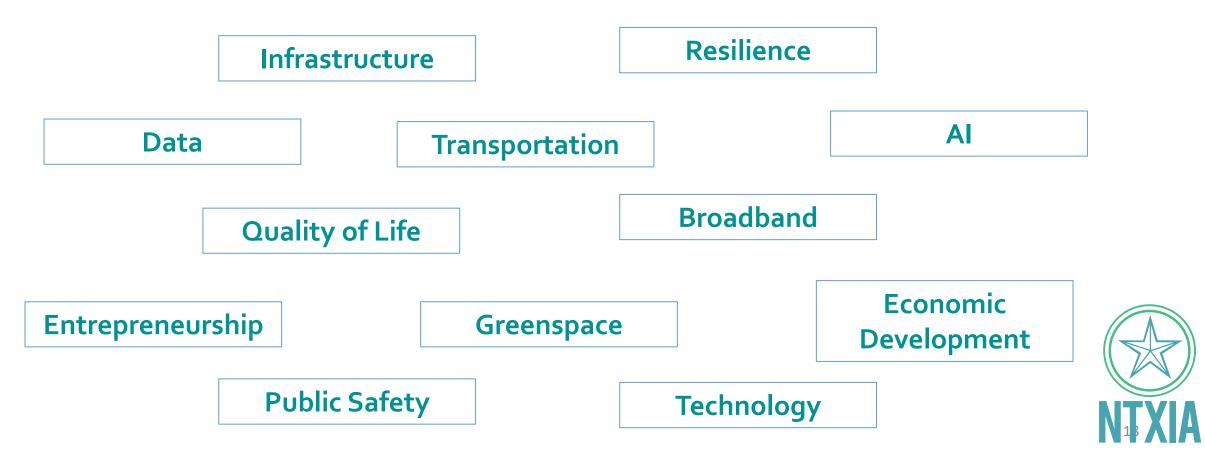

To create the most connected, smart, and resilient region in the country.

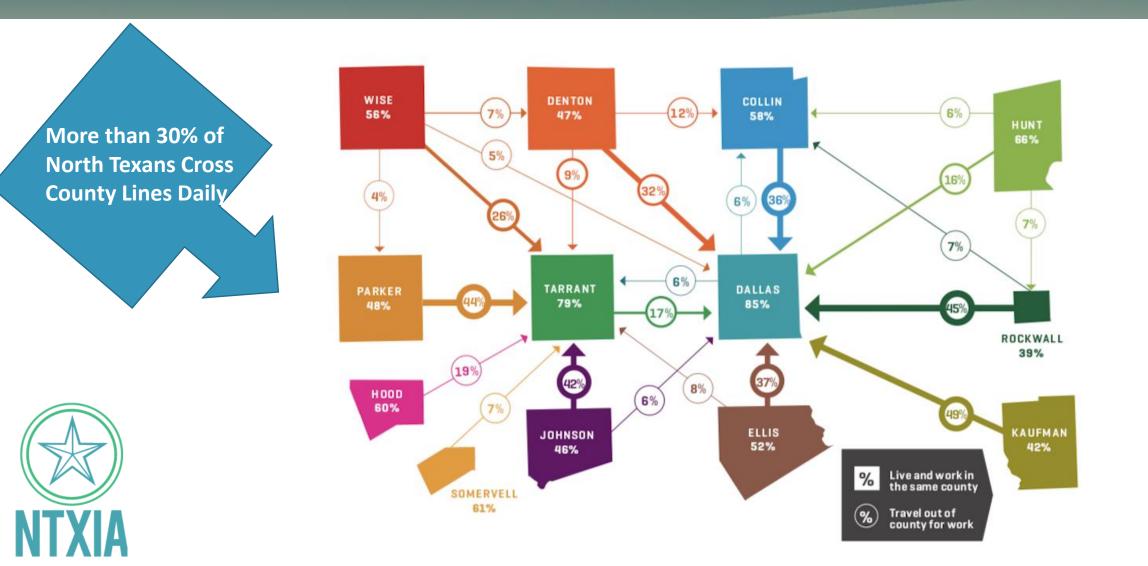

### Smart NTX: Building the Vision

What is the North Star – are connections made early and often?
 How can a lens of innovation and 'one investment -> many outcomes' become part of DNA?
 What does success look like?

### Do You Know Where You Are? Does it Matter?

### Why a Regional Approach is Critical

Blurring Geographic Boundaries

#### Aging Infrastructure

Extreme Weather Events & Health Crises

Workforce Pipeline and Upskilling

Population Inflow

Technology Implementation & Challenges

### What we Already Know

### The game has changed, and will continue to do so...rapidly

DARIUS FOROUX

## Al can be part of fulfilling expectations

### Step 1: Policy, Training, Communications

- Internal: Staff efficiencies through Generative AI
- Internal: Asset Management
- Expediting permitting and inspections
- Digital Twins for infrastructure, traffic and resilience program design

#### Procurement just isn't that sexy.

Government Innovation Isn't Always Flashy...

### SHIFTS IN PROJECT PLANNING APPROACH

# Five most expensive words in home improvement:

### "While we are at it"

### Five cheapest words in city project planning:

"While we are at it"

### Where 'Walls in' and 'Walls out' Meet

### POWER & PROTECT THE FUTURE NEXT-GEN RESILIENCE HUB & REGIONAL MICROGRID NETWORK DEVELOPMENT

# Where Less is More: Freight Signal Optimization

#### Less:

- Emissions
- Fuel
- Time
- Traffic

#### 

The Freightpriority Ecodrive app provides real-time advisory information to any mobile device. The driver will know when the traffic signal will change, as well as the recommended travel speed, to arrive at the traffic signal when it is ready to turn green.

### SMART PRIORITY SYSTEM

The Smart Priority system uses GPS location data from a truck's existing AVL system or from the Freightpriority Ecodrive app to provide added green time, as needed, to allow the truck to safely proceed through the traffic signal.

The use of Freightpriority Ecodrive limits the need to change the existing signaltiming plan through interventions like added green time.

# CALL FOR INNOVATION DRONE & ROBOTICS DEMO DAY

#### Call for Innovation & Demo Day:

- 90+ Companies of Interest
- 10 Selected from Region, US and EU
- 7 County departments
- 65+ Attendees
- 6 additional public agencies across municipality, regional planning, public safety and transportation
- 4 higher-education institutions
- Economic development organizations
- Local, Industry, and National Media
  Coverage

### Innovative Mobility Solutions for Equity Digital and Literal

### **Grocery Connect is making food** deserts a thing of the past.

At each of our community service centers, a helpful concierge can help:

- Show you how to order your groceries via the Kroger online platform
- Support you throughout the ordering process
- Assist you in applying for SNAP eligibility to increase your purchasing power
- Liaison with our partner Kroger for situations that need special support
- Introduce you to the regular Kroger drivers who will walk you through each order to guarantee accuracy and your complete satisfaction
