The MATHCOUNTS Competition Series is the premiere math competition for middle school students in the United States.

With live events in over 500 locations every year, MATHCOUNTS is the only nationwide competition that brings students together to compete in-person in math.

1 National Champion is crowned during the Countdown Round of the National Competition, webcast on ESPN

224 stellar students earn an all-expenses-paid trip to the National Competition in May

State Competitions are held in 56 states and U.S. territories in March

40,000 students advance to one of 500 inter-school Chapter Competitions in February

100,000 students in over 5,300 schools take part in intra-school competitions

48,000 U.S. middle schools receive free curriculum materials every year

The National Math Club is designed to provide the **structure, resources** and **incentives** to make it easy for any teacher to run their own math club.

This program is completely **free** (no catch!) and designed for students of all ability levels in math. Multiple teachers from the same school can sign up.

Oklahoma MATHCOUNTS

- Oklahoma has participated since the inception of the program
- In 2024, we will host 3 regional and 1 state competition
 - Central Oklahoma Regional – Saturday, January 27th (University of Central Oklahoma)
 - East Central Regional – Saturday, February 3rd (University of Tulsa)
 - Southwest Regional – Saturday, February 17th (Cameron University)
 - State – Saturday, March 2nd (Oklahoma City University)
- In need of volunteers for all 3 events – sign up at oef.org
