PACIFIC OCEAN DIVISION AREA OF RESPONSIBILITY

"A world-class organization that values its people, allies, and partners, and delivers engineering solutions to the Indo-Pacific and Arctic regions for generations to come."

Japan District
Strong Host Nation Engagements & Innovative Engineering Support

Far East District
Enhancing Host Nation Support & Defense

Alaska District
Arctic Expertise & National Defense Support

Honolulu District
Pacific Island Partners & International First Responders

Resilient People

- Recruit and Retain a World-Class Workforce
- Create and Sustain a Culture that Emphasizes Safety, Diversity, Equity, and Inclusion

Results

- Set Conditions for Successful Civil Works Program Delivery
- Enable Forward Posture – *Military and Host Nation Construction, Remote Locations*

Relationships

- Strengthen Alliances and Partnerships in the Indo-Pacific
- Partner With Industry & Non-USACE Stakeholders

Revolutionize

- Enable Data Driven Decision Making
- Apply New Processes and Methods – *Research & Development, Climate Change, Design & Construction Quality*

Alaska District and Honolulu District

- Utilize Indefinite Delivery Contracts (IDC) for most engineering, design, environmental services, and construction projects. Some construction projects are also conducted as direct awards pursuant to the 8(a) program.
- Current IDC contracts have varying expiration dates and capacities.
- Several new and replacement actions in various stages of the acquisition are in process

Alaska District – Look for in-progress / upcoming \$97M Small Business Environmental Remediation Services Multiple Award Task Order Contract (MATOC).

Honolulu District – Look for in-progress and upcoming IDC requirements Environmental Support Services.

Far East District (South Korea)

- There are no Small Business set aside requirements in Korea*
- Construction solicitations are for pre-qualified Local Sources for construction of MILCON and SRM workload. Local Sources are those sources physically located and licensed to conduct business in Korea.
- Look for in-progress / upcoming \$200M Construction Security Monitoring MATOC.

Japan District

- There are no Small Business set aside requirements in Japan*
- Construction solicitations are for Local Sources only. Local Sources are those sources physically located and licensed to conduct business in Japan.
- Utilizes IDIQ Construction Contracts with local source / host nation firms.
- Look for in-progress / upcoming \$245M Okinawa Sustainment, Restoration, and Modernization MATOC.

*Note: Federal Acquisition Regulation, Part 19 clarifies Contracting Officers are allowed, but not required, to use set-aside and sole source procedures for procurements where performance is outside the U.S., however, international agreements must be considered and may preclude any set asides.

LOOK FOR CONTRACT OPPORTUNITIES AT  **SAM.GOV**®

9

- Access SAM.gov. Procurement opportunities with a value of at least \$25,000 are published on this website
- Monitor the  **SAM.GOV**® website. Look for the projects mentioned in this briefing (use key word search), and search for other POD solicitations using: **W911KB** (Alaska), **W9128A** (Honolulu), **W912HV** (Japan), **W912UM** for (Korea) (use solicitation # search)
- What WON'T you find there? You won't find task order solicitations for multiple award or single-award contracts, which are restricted to Multiple / Single Award Contract holders awarded as IDIQ contracts
- What else WILL you find at  **SAM.GOV**®? “Sources Sought” announcements. These are solicitations of interest and a means to conduct market research. Your responses may influence how a federal agency “packages” an eventual solicitation.

HOW CAN INDUSTRY HELP?

Looking to industry to bring its wide-range of experience and expertise to bear in delivering high quality projects for our diverse client base

- The U.S. Army Corps of Engineers relies exclusively on industry to construct all of our projects, as well as design many of them, so we need as broad of participation as we can get to best serve our service members, public clients, and U.S. taxpayers alike

Respond to Sources Sought Notifications

- The U.S. Army Corps of Engineers uses these responses to aid in sourcing decisions. Obtaining industry input in the early stages of acquisition planning is vital to sound decision making.

Participate in Industry Outreach Events

- The U.S. Army Corps of Engineers values the input we get from our industry partners. If you believe we can improve through process or requirement revisions, let us know
